

Revolutionize Your Project

Wolcott has developed processes and technology to revolutionize landwork, due diligence and data management.

Our processes and infrastructure cultivate more efficient landwork and provide for project collaboration and real time reporting for our clients' convenience.

We employ a full-time IT and software development team to support our server systems, client's access and our field people. We continue to developing tools to make our systems and processes even better.

Smart Maps for a Smarter Project

Wolcott maps serve as the foundation for strategic decision-making, data validation and reporting for even the most complex land management projects.

Custom maps, driven by extensive data-sets are deliverable in digital or physical formats. Standard mapping includes land status, leasing, mining claims, pipeline alignment sheets and overall prospect development.

Wolcott's mapping department offers a full range of GIS and GPS services. From Base Maps to Smart Maps, Wolcott utilizes the latest geospatial technology to produce professional, functional map and data products.

We specialize in ArcGIS and AutoCAD, enhanced by decades of field experience, extensive land experience and formal certification.

Power Your Project

Your company can work smartly and cost efficiently with Wolcott and SuChris on your team.

Utilizing the server-based SuChris Data processes, Wolcott can attract and employ the best and most experienced landmen in the industry, working remotely from various locations throughout the country. No more need to load up the courthouse and incur costly landmen per diems.

These innovative processes allows your Wolcott team to mobilize large or small crews quickly, both on the ground and digitally, beating the competition and arriving at the bottom line more cost efficiently.

Committed to the Industry

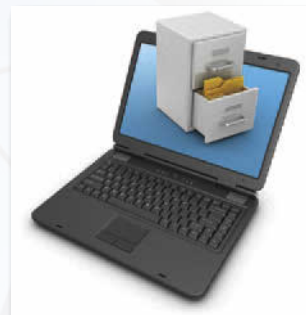

Wolcott has spent the last few years developing the technology and processes that cultivate more efficient landwork. Our partnership with SuChris and our commitment to our clients in providing the best land services and the best data management solutions in the industry have proven valuable time and time again as we have come through on the most challenging projects. We are completely committed to providing the most efficient and cost effective solutions.

Conquer Your Data!

SuChris makes the mountain of data in today's Natural Resource Industries a much easier climb. SuChris specializes in digitizing data sources. From courthouse and title plant documents, to bankers boxes, let us

take that information and make it easier to access for anyone in your organization, both local and remote. On Due Diligence or other projects, SuChris captures documents quickly and makes them available to all parties.

The SuChris Process

CAPTURE

- We can retrieve data from any medium in any location. Courthouses, Title Plants, or Client offices, we can set up a small, efficient capture team to retrieve the needed Data.
- Our scanning crews are teamed with experienced landmen to capture only the necessary data and do it the right way the first time.
- We use the latest specialized high speed capture equipment to get the best quality images from any media in the most efficient manner possible.

PROCESS

- Our post processing team, using the latest software, is experienced in the best ways to make documents readable while maintaining a reasonable file size.
- We have expertise and experience in indexing large volumes of documents efficiently and quickly.

DELIVER

- We utilize Microsoft SharePoint technology to provide access to all of the documents we capture in an organized and collaborative format.
- You can access this information from anywhere in the world you can get internet access.
- Multiple users can access data simultaneously.
